

Vocalocity | *Online Backup and Storage*

Vocalocity's Online Backup and Storage is a convenient feature available to all Vocalocity customers. Now the same company that provides your business phone service can also ensure the safety of your data. Backing up your files with Vocalocity means peace of mind about your files, and fewer bills to pay.

2 GB of FREE storage offered with each Vocalocity account!

WHAT'S THE BIG DEAL ABOUT BACKUP?

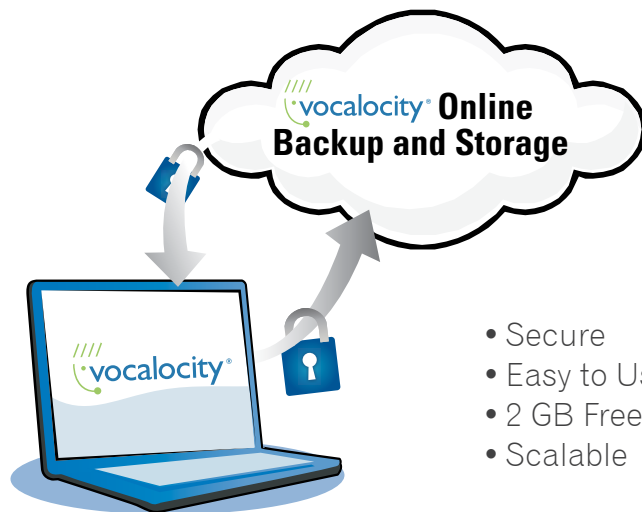

There's a lot of important information on your computer. Financial documents, spreadsheets, emails, digital photos and more are all located on your hard drive. But if that's the only location your data is stored then it isn't totally safe. Hard drives can crash, be attacked by viruses, get stolen or be destroyed in natural disasters and all that important information can be lost instantly.

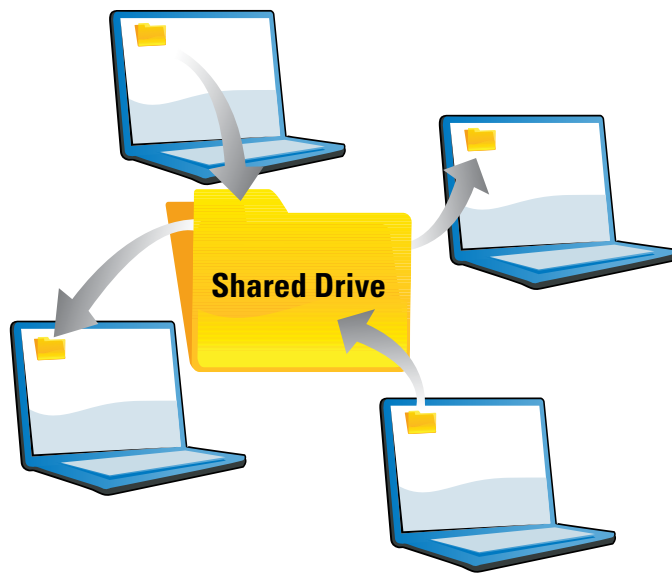

HOW DOES IT WORK?

Download the Vocalocity Online Backup and Storage client from the Vocalocity account User Interface. The set-up wizard will walk you through the installation steps. All you need to do is select which folders you want to backup and schedule when they should be updated. Your data is uploaded to our secure storage facility and you can then recover it in the case of an emergency. You can even restore an old version of a file that you've changed.

INSURE THE SAFETY OF YOUR DATA.

Vocalocity Online Backup and Storage (VOBS) is a safe and simple way to back up all the important files on your computer. Simply select which files and folders to backup and they are automatically updated daily at the time you specify. Your data is stored in a secure, remote location and is easily retrievable when needed.

EASY ACCESS WITH SHARED STORAGE

In addition to online backup, you also receive the benefit of a shared storage drive. Without a central server it's hard to share documents and files with other employees in your company. They either get cluttered up in email inboxes, or are shared using media such as CDs and jump drives. With shared storage all the employees in your company have access to the same hosted folder via their desktop. Simply save an item to the shared storage folder and everyone in your company has access to it. This reduces clutter and confusion, centralizing all your company's shared data in the same location, accessible over a secure connection.

HOW MUCH DOES IT COST?

Every Vocalocity account gets 2GB of online backup absolutely free. Here are some basic rule of thumb examples of how much space that is:

- 130,000 pages of Word Files
- 330,000 pages of Excel Files
- 200,000 Pages of Email Files

2GB of backup is yours as part of your Vocalocity account. If you use more storage space a small monthly fee is incurred, based on the following pricing.

VOCALOCITY ONLINE BACKUP & STORAGE PRICING

Under 2 GB	FREE
At least 2 GB but less than 5 GB	\$10/month
At least 5 GB but less than 10 GB	\$15/month
At least 10 GB but less than 20 GB	\$20/month
20 GB or more	\$1 per GB/month

DATA SECURITY

Preventative measures are critical to protect against data loss. Too often businesses act too late to ensure the safety of their data. By scheduling backup through Vocalocity's VOBS client you won't have to worry about your data security ever again. There is no maintenance after the initial install and in the event of a disaster data backup is a true life saver.
